

Electrolytes

Electrolyte supplements designed to aid in calf hydration

NSC-CALF LYTE

NSC- Calf Lyte is a general electrolyte used for all calves from day one, and through each life stage, to encourage water consumption. Hydrated cattle are healthier cattle - electrolytes and adequate hydration support immune and muscle function in calves.

Ingredient Statement

Dextrose, Sodium Citrate, Salt, Potassium Chloride, Glycine, Monosodium Phosphate, Silicon Dioxide, Saccharin Sodium, Glycyrrhizin Ammoniated

Mixing Directions

Mix 25 grams in 2 quarts of warm water per calf.*

NSC-CALF SECURE

NSC- Calf Secure is an emergency electrolyte for scouring calves. Because it is formulated with protein, NSC- Calf Secure can be fed in place of a milk feeding to help keep calves hydrated during the peak of scours.

Ingredient Statement

Animal Plasma, Maltodextrin, Dextrose, Salt, Sodium Acetate, Glycine, Sodium Citrate, Hydrolyzed Yeast, Brewers Dried Yeast, Potassium Chloride, Silicon Dioxide, Potassium Citrate, Lecithin, Canola Oil, Polyoxyethylene Glycol 400 (mono & dioleates), Dried Bacillus subtilis Fermentation Product, Sodium Silico Aluminate, Natural and Artificial Flavors, Magnesium Sulfate, Saccharin Sodium, Glycyrrhizin Ammoniated

Mixing Directions

Mix 1 scoop with 2 quarts of warm water per calf. 1 scoop contains approximately 4 ounces.*
NSC - Calf Secure cannot be fed more than 6 times.

*Store in a cool, dry place for maximum stability. Avoid leaving packages open for extended periods of time.
